About Us.

Jet Construction Solutions is a multi-disciplinary contractor delivering well-managed MEP, construction, and fit-out packages across commercial, industrial, residential, and specialist environments. Founded by three directors with decades of experience, we bring strong technical capability, dependable delivery, and a straightforward, solutions-focused approach.

We operate with skilled in-house teams supported by a trusted network of specialist subcontractors, enabling us to provide consistent quality and a collaborative, controlled service across every project.

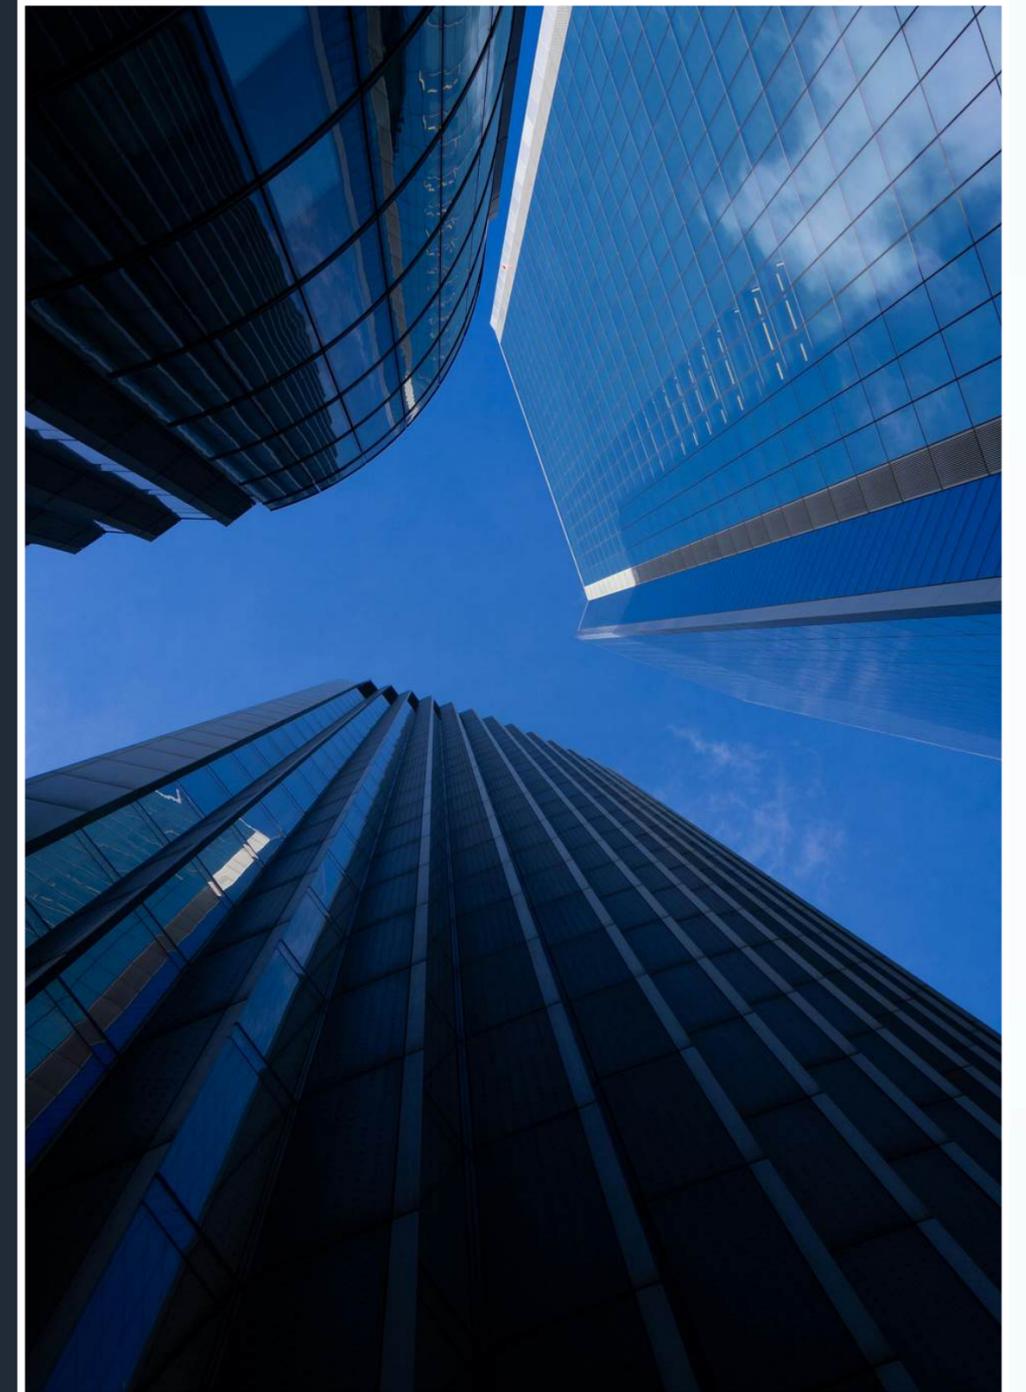

About Us.

Our focus is simple: to deliver work properly, communicate clearly, and build lasting relationships through capability and reliability.

Whether we're completing a standalone MEP package, coordinating multi-trade works, or delivering a full refurbishment, we bring the same level of care, accuracy, and professionalism.

Clients choose Jet because we are easy to work with, technically strong, and confident in managing strict programmes, live environments, and complex coordination. We approach every project with calm, clarity, and commitment, ensuring well-managed outcomes from start to finish.

Jet Construction Solutions is a partner you can rely on: practical, experienced, and dedicated to delivering work that stands the test of time.

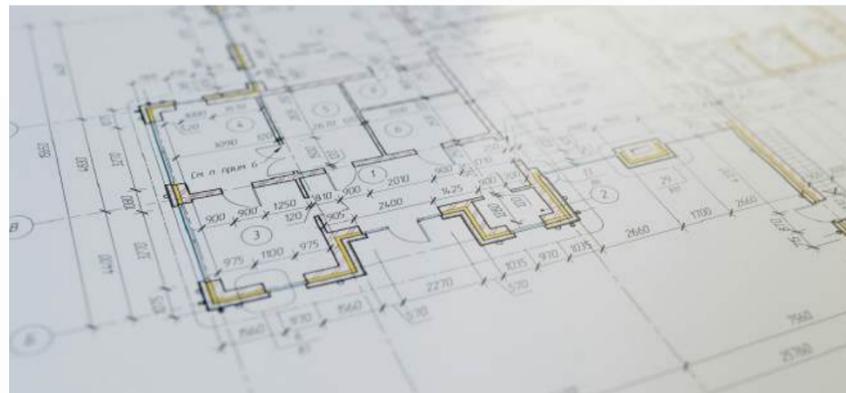

02

Why clients choose us.

- Proven technical capability across MEP and multi-trade delivery
- Steady, controlled management of complex and live environments
- Reliable progress built on clear coordination and communication
- Skilled in-house teams supported by specialist partners we trust
- Approachable, experienced people who work collaboratively with every stakeholder
- Consistent, high-quality delivery backed by accountability and ownership

03 How we work.

Planning & Coordination

We begin with clear planning and precise coordination, ensuring every element of the programme, sequencing, and interfaces is understood from the outset. Our teams manage the technical demands of MEP and multi-trade environments with accuracy and control.

Collaboration & Communication

We work closely with clients, consultants, and contractors, keeping communication direct and decisions well informed. Progress is monitored continuously, and any issues are identified and resolved early to maintain momentum.

Delivery & Accountability

Our approach is straightforward, consistent, and built on accountability. We focus on safe delivery, steady progress, and reliable quality across every project, ensuring a smooth and well-managed process from start to finish.

04 Our services.

Jet Construction Solutions delivers well-managed MEP, construction, small works, and full fit-out packages across commercial, industrial, residential, and specialist environments. Our services are designed to provide clients with reliable delivery, clear coordination, and strong technical capability across every stage of a project.

05

MEP Services

We provide fully managed Mechanical, Electrical, Public Health, Solar and Temporary Electrics packages, delivered by experienced teams who understand the technical demands of modern building services.

From plant and pipework to power distribution, lighting, controls, and renewables, we ensure every installation is coordinated, compliant, and completed to a high standard.

Construction Services

06

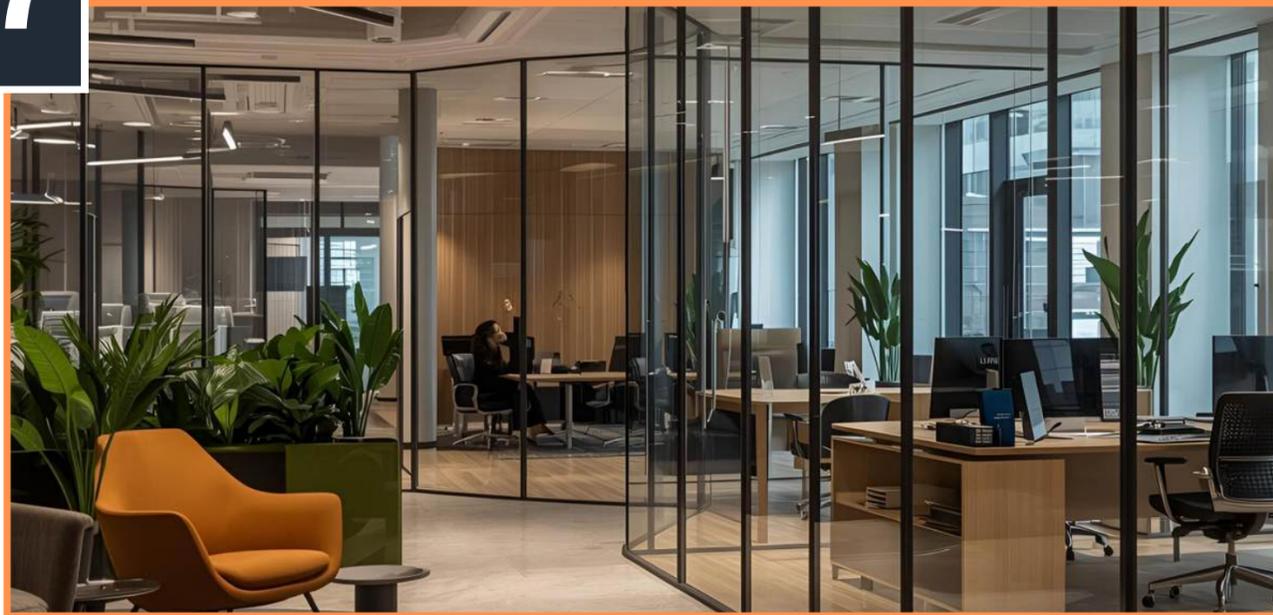

Our construction capability covers roofing, scaffolding, carpentry, joinery, partitions, ceilings and core trade packages.

We combine skilled in-house operatives with trusted specialist partners to deliver well-organised, high-quality work that integrates seamlessly with wider project requirements.

07

Small Works

We manage reactive works, minor refurbishments, compliance upgrades, and commercial alterations with the same level of care and coordination as larger packages.

Our small works service is ideal for clients needing quick, reliable solutions carried out safely, efficiently, and with minimal disruption.

Fit-Out & Refurbishments

08

For clients seeking a complete solution, we deliver full interior fit-outs and refurbishments—bringing together our MEP, construction, and finishing trades into a coordinated, well-managed package.

Whether Cat A, Cat B, retail or hospitality, we focus on delivering quality, clarity, and dependable progress from strip-out to handover.

09

Health, Safety and Compliance.

Health and safety are built into the way we plan and deliver every project. Each task is prepared with clear procedures, practical risk assessments, and method statements that reflect the reality of working in live, technical environments.

We manage risk from the outset and stay ahead of it as the project progresses. Our teams coordinate interfaces, control working areas, and keep sites organised so work can move forward safely and efficiently. Whether we're delivering MEP installations, multi-trade packages, or full refurbishments, our standards remain consistent: controlled, compliant, and well managed.

Everyone on our sites understands their responsibilities, supported by ongoing training, active supervision, and routine checks that maintain safe working practices. We work openly with clients and supply chain partners, ensuring documentation is clear, communication is direct, and decisions are informed.

Safety, quality, and compliance are part of our *everyday* approach, embedded in how we work and delivered on *every* project.

Everyone. Everyday. Every Project.

10

Our Commitment.

At Jet Construction Solutions, our commitment is to deliver work you can rely on. We take ownership of every project, communicate clearly, and focus on doing things properly from first discussions to final handover.

We apply strong technical expertise, careful coordination, and a steady approach across all environments. Our teams are experienced, approachable, and driven to achieve the best outcome, whether we're delivering a single package or a full refurbishment.

We value long-term relationships and earn trust through consistent quality, dependable delivery, and genuine commitment. Every project matters to us, and every client receives our full attention.

This is the standard we set and the standard we bring to *every* project: professional, collaborative, and built to last.

11 Contact Us.

We're always ready to discuss upcoming projects, answer questions, or explore how we can support your next programme of works.

Our team is approachable, responsive, and committed to providing clear information from the start. Whether you need a single package or full project delivery, we're here to help.

Get in touch with us to start the conversation.
